

Monumental Door System Replacement

Project Requirements

- Access needed for all types of traffic.
- Improve operational speed.
- Update door system for improved operation and energy savings.

Door Systems' Solutions

- Redesign opening to allow for greater height clearance.
- Install new sectional system with electric operators for greater speed and efficiency.
- Incorporate smaller sectional door to the side of the larger door for more efficient small load requirements.
- Utilize Thermacore™ insulated sectional panels for maximum energy savings.
- Maximize opening effectiveness with a state-of-the-art door design and operation which requires less service and easier access.
- Provide total project requirements plus design assistance.
